

#### Flow indicator

Reading in Imperial Gallons  
This reading will appear on  
your bill

#### When checking for leaks:

- Turn off all taps
- Observe the flow indicator – once it is moving, there is a leak
- Call in a plumber to locate and repair leaks as soon as possible

This is a typical household water meter ( $\frac{1}{2}$ " ). It is usually colored blue or in some cases, it is brass-colored.

It is usually located near the front of your property in a black meter box.
